Each Lender will need to coordinate the mapping of their fees to each section with your Customer Support team as part of their DocMagic set-up to use these SEQ documents. The disclosures available through these document codes serve as examples and include terminology specific to the products we provide. Lenders must review and modify the HELOC Important Terms and HELOC Agreement as needed on a periodic basis to adhere to any applicable federal or state laws. In certain cases, this may require creating a customized version of the disclosures in collaboration with your document provider. It is the lender's responsibility to assess the documents included in the disclosure packages to confirm adherence to the regulatory standards pertinent to your lending institution.
